

Why you should support us

Our website advocates a new cancer treatment protocol, using the compounds Quercetin and Vitamin C. **We only have 25 new visitors a day on average.** This is way too little. We need to attract more people to come to this website. This is why we need to buy more advertisements. Advertisements can be expensive, but are a very effective way to attract visitors.

This is why you need to support us. With your support we can buy more advertisements.

You can also **buy advertisements for us**, but this is rather complicated. If you want to do this, please contact us.

Our website is about the only website that advocates an alternative way to treat cancer using a compound from fruits and vegetables (Quercetin) that is relative **side effect free**, compared to the conventional forms of cancer treatments, such as chemotherapy, radiation and surgery.

If we make more advertisements, more cancer patients can learn about this alternative method, that is an **extreme good addition** to conventional cancer treatment methods.

We need all help right now.
